

Infinity Series IBC

A sustainable IBC solution that gives plastic materials new life

An IBC with a lower carbon footprint and same great performance? Yes, please.

HIGHLIGHTS:

- ▶ Infinity Series of products incorporate recycled plastic generated in-house
- ▶ UN and non-UN options available
- ▶ Available Sizes - 275 G / 1,000 L
- ▶ Bottle Colors - Natural, White, Black
- ▶ Compatible with all pallet types
- ▶ Plastic components also made from recycled plastic

CLOSING THE LOOP

The Infinity IBC features up to **70% recycled plastic** in the total package. High-quality, natural-colored recycled plastic used to produce the bottle is generated from empty industrial packaging that has been collected and recycled at a Mauser Packaging Solutions location.

PROTECTION YOU CAN COUNT ON

The innovative, multi-layer Infinity IBC is available as a UN or non-UN package and is compatible with a plastic, composite, or wood pallet. It's suitable for use with hazardous and non-hazardous products.

KEEPING PRODUCTS SAFE AND SECURE

The IBC bottle utilizes multi-layer technology whereby the innermost layer is made from 100% virgin HDPE resin while the external layer is made from up to 40% recycled plastic. Filling goods only come in direct contact with virgin material.

GOOD FOR YOU, BETTER FOR THE PLANET

The Infinity IBC bottle features up to a **25% lower carbon footprint** compared to a bottle made from virgin resin. Post-use, the Infinity IBC can be collected, reconditioned and reused through participation in our [Global Return Program](#).
