General remarks:					

Customers declaration:

The customer declares, that the chosen hazardous material class is correct and that all packaging meets the following requirements:

- units are empty with state-of-the-art technique
 - all openings are hermetically closed with original lid, outlet valve and sealing cap
 - units are free from outside contamination
 - all units are reusable (no damages to cage or pallet, for example deformation and oxidation that affects the transport)
 - filler, filling good and filling good classification is clearly indicated. All markings meet applicable regulations for traffic law. Label plate, markings for filling good, filler of the hazardous material, filling good and filling good classification is clearly indicated.
 - If the last filling good was toxic, flammable, carcinogenic, mutagenic or excessively hazardous or smelling, the IBCs must be decontaminated and clearly labelled as "NEUTRALIZED"
 - No product other than indicated had been filled into the ibc
 - Packaging that contained products with GHS-classification H200, H201, H202, H203, H220, H222, H224, H240, H241, H300, H301, H310, H311, H330, H331, H340, H350, H350i, H360, H370 and H372 have to be professional disposed at cost of customer.
 - MSDS are available and will be submitted from customer to the contractor on request
- Drivers will be granted access to the collection point, so that observation of the loading activities is possible. Please be aware that the packaging cannot be assessed by the driver.
- All IBCs will be assessed by qualified personnel by entry at NCG location. In case that the quantity announced is different to the quantity of packaging ready for collection, packaging do not meet the conditions set out above or if disposal is required according to the assessment marks (toxic, flammable, carcinogenic, mutagenic or excessively hazardous or smelling), NCG reserves right to:

- reject the collection
- charge disposal costs for professional disposal of unusable packaging or residues to the customer
- charge incremental freight expenses for pickups where the number of IBCs does not match the number in the request.

The collection occurs on the basis of the General Terms and Conditions of Service for Products and Services of National Container Group in Germany in the version 2017.1 as at 23.01.2017 (www.mauserpackaging.com). With signature the customer confirms that he has read and explicitly accepts the content.

Herewith I order obligingly the collection of the packaging and agree to the above mentioned conditions:
