

## DrumGuard® Quattro Multi – When innovation meets sustainability

 **MAUSER**  
Packaging Solutions

**REDEFINING SUSTAINABILITY**

**Safest load securing option**  
- EUMOS 40509 certified.

### Safety and Quality

Drums are held in a defined position, which ensures highest packaging quality during transportation.

### Time efficiency

95% faster installation compared to conventional load securing methods.

### Certifications

Pallets secured with DrumGuard® meet legal and regulatory requirements and are certified according to international standards.

Quick, ergonomic and flexible installation

### Sustainability

DrumGuard® is an innovative alternative to conventional methods to build loading units with drums on pallets. It avoids high amounts of plastic waste and provides significant CO<sub>2</sub> reductions.

### Circular economy

DrumGuard® is designed to be used multiple times. With more than 100 collection sites all over the globe we make sure that DrumGuard® finds its way back to you.

Easy recollection and reuse

### Suitable for different drum types

Steel tight head drum

Steel open head drum

Steel necked in open head drum

Plastic tight head drum

### Solutions for different pallet configurations

DrumGuard® Quattro Multi is part of a product family. Load securing devices for one, two and three drums complete the DrumGuard® series.
