BUILT TO LAST

Industrial environments are demanding and harsh. Our corrosion resistant, stainless steel IBC portfolio is fabricated using heavy duty, 10-gauge, 304 stainless steel and engineered to last for years in service. Sizes range from 125 to 550-gallons.

RETURN. REUSE. CONSERVE. REPEAT.

Post-use, stainless steel IBCs can be collected, cleaned, repaired, inspected, tested per regulatory requirements, and reused through participation in our Recover Syst-M program.

PERFORMANCE YOU CAN COUNT ON

This package is certified to meet UN31A specifications for the transportation of appropriate Packing Group II and III hazardous material liquids. Additionally, 1/4" thick combination top lifting and stacking lugs help provide more secure stacking - saving you space.

CONTAIN THE UNCONTAINABLE

Stainless steel IBCs are ideal for challenging applications that can't be met by caged/composite IBCs (e.g. appropriate flammable and corrosive liquids, high fill temperatures, etc.).

SOLUTIONS BUILT FOR YOU

Choose from a variety of dimensions, finishes, discharge valve locations, adapters, and vents and caps. Optional accessories such as heating/cooling jackets and internal heating coils are also available.
